CURIOSITY QUESTION:

As TV channels have claimed, about 21, 79, 57,483 watched the coverage of the Prime Minister's swearing in ceremony.

What could be the greatest and least possible number of people, who could have watched the programme, so as to confirm the claims of the TV channels?

ANSWER GUIDE:

- Estimate the number to the nearest crore.
- What is the place value of 2?
- Is it possible that the maximum number of people, who watched the programme was 21,79,000 ? If not, find the maximum number of people who watched the programme.
