

D.A.V. PUBLIC SCHOOL, VELACHERY, CHENNAI 42

CLASS: VIII

SUBJECT: SCIENCE

CHAPTER: 7. CONSERVATION OF PLANTS AND ANIMALS

SUBTOPIC: FLORA AND FAUNA

EXPERIENTIAL LEARNING

ACTIVITY:

Aim: To enable the students to learn the diversity in fauna and flora.

Materials Required: Booklets, Scrapbook, Pictures, Photographs etc.

Procedure:

- Students will be asked to identify the various type of flora and fauna present in their locality and in their school campus.
- They will be instructed to click/draw their pictures and find their names.
- The collected details will be made as a booklet.
- The students will be asked to compare with their classmates' collection and group discussion will be encouraged to learn diversity in fauna and flora.

CURIOSITY QUESTION:

Did you ever attempt to know the names of the animals and plants in your neighborhood?

ANSWER GUIDE:

- Do you find the same number of trees and animals near your friends' house?
- Do all these animals and plants belong to the same group/species?
- Why is this place abundant with this particular tree but not in your place?
- Why are there less number of trees in your place?
- How can you grow more trees and conserve them?
