

Activity Number-G 5

Class - VI

Subject – S.St.

Month-October

Duration-30 min.

Activity – Domains (PEC)

Lesson-5 Major domains of the earth

Learning outcome –The students will be able to analyze the various organisms present in different domains.

What I have to do? - To discuss about various domains and their characteristics.

What I require? - Chits, chalk, whistle, basket ball and placards

Nature of activity- Class activity

What I already know? – Land, water and air.

How will I proceed? Teacher's activity- Teacher will write the names of 3 domains on 3 boxes and give one chit to each child on which the name of a living or non-living thing is written.

Student's activity-

1. Each student will get one chit.
2. Don't see the chit until your turn comes.
3. Dribble the ball until you reach towards the box
4. See the chit, dribble the ball and find out the appropriate domain.
5. Monitor will blow the whistle.
6. One by one after whistling each child will start moving.
7. Without discussion 1 student will run from the starting point and put the chit in the correct box.
8. Come to the starting point by dribbling the ball.
9. Wait till the students of whole class put the chits in the boxes.
10. Now one by one Monitor call out the word written on the chits from each box and the students will decide whether the chits are put in correct box or not.

What have I observed?

LIST OF THINGS	ATMOSPHERE	HYROSPHERE	LITHOSPHERE

What have I learnt?

Q1. List any three sources of water in hydrosphere.

Ans. _____

Q2. Do you think the domain of Biosphere is important for you? Why

Ans. _____

Q3. In which domain do you find the gases? Can you name some gases?

Ans. _____

Q4. Why do you think atmosphere is useful for the existence of life on earth?

Ans. _____
