

Subject – Geography

Month-November

Duration – 1 Hr

Activity – JIGSAW

Lesson – Human environment interaction: Tropical and Sub-Tropical Regions

Learning outcome- Students will be able highlight the features of tropical and sub-tropical region.

What I have to do? - To reflect upon the features of tropical and sub-tropical regions.

What I require? – Textbook and a sheet of observation table

Nature of Activity – GROUP ACTIVITY

How do I Proceed?-

Teacher's Activity -

1. Class of 40 students will be divided into 8 groups consisting 5 students each.
2. First four groups will be given the sub topics on the amazon basin and the latter will be given the sub topics on Ganga Brahmaputra basin.
3. Students will be informed about the topics of an activity a week before. They can explore about the topics in advance.
4. Students from every group will choose their leader themselves.
5. They will discuss about the topic in detail in their group. They can refer the textbook for the preparation.
6. They will present their topic in front of the class.
7. After the presentation, students fill the observation sheet of the other group. (E.g. the presentation group of amazon basin will fill the observation table of the Ganga Brahmaputra basin.
