How you will look at the web page ? What are the steps for it ?

Procedure : To look at the web page you can use web browser. Internet explorer is often used as web browser. To view the web page with the help of internet explorer perform the following steps :

1. Click on Start → Program → Internet Explorer.
2. Click on menu file → open.
3. Reach on browse button. Click on open button.
4. Click on OK button. Internet explorer will show the following written message.

HTML Coding :

The screenshot shows a Notepad window titled 'sunny - Notepad'. The menu bar includes File, Edit, Format, View, and Help. The text area contains the following HTML code:

```
<html>
<head>
<title>
sunny
</title> </head>
<body>
This is my first web page in HTML document.
</body>
</html>
```

The status bar at the bottom right indicates 'Ln 9, Col 8'.

Output :
