

PRACTICAL - 21

Write the steps to change a color of text.

Procedure : COLOR defines the colour of the font to be used. It is defined with an example as shown with html code and output in fig.

```
<FONT FACE="ARIEL" color="RED">WELCOME TO HTML</FONT>
```

The screenshot shows a Notepad window with the title bar 'color - Notepad'. The menu bar includes 'File', 'Edit', 'Format', 'View', and 'Help'. The text area contains the following HTML code:

```
<html>  
<head>  
<title> MY Font Page </title>  
</head>  
<body>  
<font face = "time new roman" color = "red">  
This local text look different  
</font>  
</body>  
</html>
```

The status bar at the bottom right indicates 'Ln 10, Col 8'.

Output :
