

PRACTICAL - 23

Write the steps to using Break Line tag in HTML.

**Procedure : Break Tag
 :** The line Break tag is used to start the text from the new line. This tag does not leave a blank line space as the paragraph tag does. The text jumps to the new line on using break tag. The tag
 is a symbol for line break.

html code

```
<HTML>
<HEAD>
<title> break
</title>
</HEAD>
<BODY>MY WEBPAGE WITH LOOK DIFFERENT <BR> WITH BACKGROUND
COLOUR AND TEXT COLOUR.
</BODY>
</HTML>
```

Ln 9, Col 8

Output
