

PRACTICAL - 28

Write the steps to create Definition List unordered in HTML.

Procedure : Definition list generally contains the definitions of different terms and their meaning. It starts with `<DL>` tag and ends with `</DL>` tag. It has two main tags definition Term `<DT>` and Definition Description `<DD>` tags. These are explained in the following example as shown in figure with html code and output.

html code

```
<html>
<head>
<title>Definition List</title>
</head>
<body>
Definitions
<dl>
<dt>Center
<dd> A point equidistant from all points on
the surface of a sphere.
<dt> Centre
<dd>In some field sports, the player who holds
the middle position on the field, court, or forward line.
</dl>
</body>
</html>
```

Ln 1, Col 1

Output :
