SELF-LEARNING

SELF-LEARNING PLAN: AN INTRODUCTION

Welcome to your journey ahead with AI!

- 
- To make this process easy and short, we have listed the three domains of AI for you.
 - We think your self-learning journey will be exciting with these three domains.
 - As we saw in Appreciate AI the domains of AI are important as they help AI perform the task it is designated to.

An elderly man with grey hair and glasses is sitting on a wooden park bench. He is wearing a dark suit jacket over a light-colored shirt and a patterned tie. He is holding a large newspaper open with both hands and looking down at it. The background is a blurred view of a park with trees and a path. The entire image has a blue tint.

When you are looking for reliable sites in your self-exploration, please follow this:

1. Always look for established institutions or agencies. For example - please use Reuters for news articles.
2. Beware of bias that the publication may have.
3. An easy way to understand the objective truth is to refer to two to three authors or publications for the same news.
4. Avoid anonymous, commercial authors, or websites. For example, it is easy to search on Quora, however, there is a high possibility of misleading content due to no authenticity or licensing.

A man in a white t-shirt and dark pants is leaning forward, supporting a young girl as she rides a red bicycle. The girl is wearing a red helmet, a striped shirt, and denim shorts. They are on a paved path with green grass and trees in the background. The entire image has a blue tint.

**LET'S BEGIN YOUR
SELF-LEARNING JOURNEY!**
