

Trapezium

Trapezium, describing a geometric shape, has two contradictory meanings:

- Outside the US and Canada: a quadrilateral with at least one pair of parallel sides (known in the US as trapezoid)
- In the US and Canada: aquadrilateral with no parallel sides (known elsewhere as a general irregular quadrilateral)

Trapezium can also mean:

- Trapezium (bone), a bone in the wrist
- Trapezium (astronomy) a group of stars in the Orion Nebula
- Trapezium (play), by Henry Rathvon

Comparisons of "trapezium" in both British and American English.
