# ANIMAL MOVEMENT

Animals move about to look for food, water and shelter, to escape from danger and also to find a mate to have young.

| Animals That Fly                                                                                | Animals That Walk and Run                                                                       | Animals That Swim                                                                                | Animals That Crawl                                                                                |
