➤ Eating Habits Of Animals

EATING HABITS OF ANIMALS

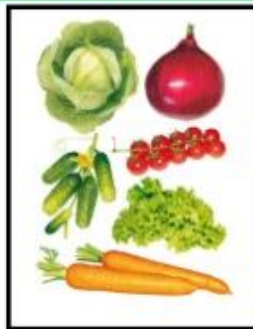

We need food to live and grow. Like us, animals too need food to live and grow. They live in different places and eat different kinds of food. According to their food habits, animals are divided into different groups.

Some animals eat only grass and all parts of plants like leaves, stems, flowers, fruits or seeds. They are called plant-eating animals or herbivore. Some examples are –

HERBIVORES

zebra

elephant

rabbit

cow

giraffe

CARNIVORES

Some animals kill other animals and eat their flesh. They are called flesh-eating animals or carnivores. Some examples are –

CARNIVORES eat other animals

lion

tiger

crocodile

chameleon

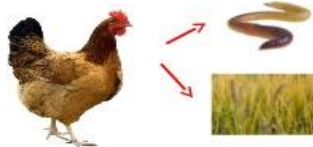

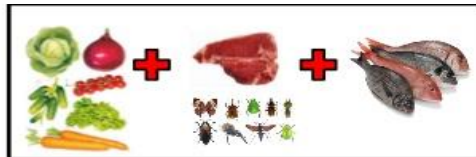

snake

OMNIVORES

Some animals eat both plants as well as flesh of other animals. They are called omnivores. Some examples are –

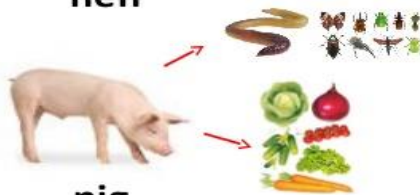

OMNIVORES
eat plants and
other animals

hen

bear

pig
