

PLANTS

**PLANTS** –We see many plants in nature. Plants are living things. Some plants are small and some are tall. Others are very big and tall.

**CLASSIFICATION OF PLANTS-** Plants are classified in the following ways according to their size :

- **HERBS**- Small plants with soft stem are called herbs. For example- grass, wheat, mint.

- **SHRUBS**- Shrubs are short plants with hard and thick branches. For example- rose, lemon, henna.

- **TREES**- Trees are big and tall plants. They have very big and hard stems called trunks. For example- banyan, mango, coconut.

- **CLIMBERS**- Climbers are very weak stem, but they need support to stand. For example-pea plant, money plant etc..

#### Climbers

- **CREEPERS**- Creepers are the plants that grow on the ground. They are very weak. For example-watermelon, pumpkin, etc..

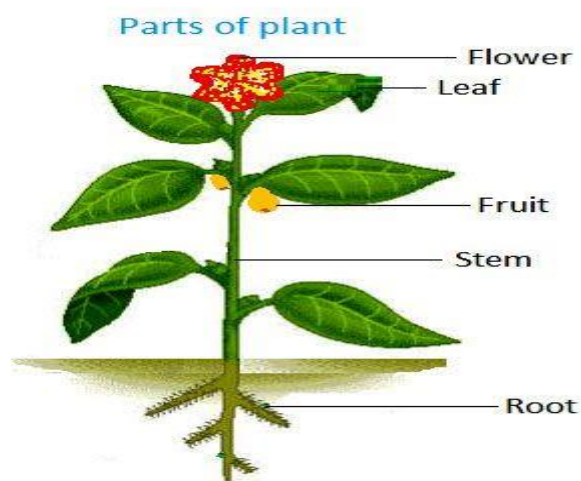

#### Creepers

**PARTS OF THE PLANT**: Plants body is divided into two parts-**ROOTS AND SHOOT**.

**ROOT**- Root grows under the soil.

**SHOOT**- The part of the plant that grows above the soil is called the shoot. It contains stem, branches, leaves, buds, fruits and flowers.

#### **HOW ARE PLANTS USEFUL TO US?**

- Plants **clean the air** and give us **shade**.
- Plants are **useful** to us in many ways.

### Medicinal plants

Neem

Tulsi

Brahmi

### FRUITS

### VEGETABLES

### Leaves of some plants we eat

Spinach

Radish

### Rubber plant gives us eraser and tyres

Rubber-plant

Eraser

Tyre

They give us wood and paper

### GRAINS

### PERFUME

➤ Plants are our green friends.
