

Topic- Parts of a Plant

Q1. Take a celery stick and a glass tumbler with water. Put few drops of red food color in the water and put the celery stick in the tumbler. Observe and note down the changes in the color of the stem and leaves. What does the change in color clarify?

Q2. Take some gram seeds. In 2 cups put cotton at the bottom and place 4-5 seeds in each cup. Keep one cup in the windowsill and the other cup inside a cardboard box. Put same amount of water in the cups. After 2-3 days check which seeds have sprouted? Write down your observation and the reason behind it.
