

Lesson Plan- Ch 3 Water 'O' Water

Learning Goals	• To know sources of water. • Uses of water. • Forms of water. • Properties of water
Learning Outcomes (LO)	• To find out the activities in which water is used • differentiate between natural and man-made resources. • To identify the various water bodies • To identify the causes of water shortage and heavy rainfall. • Discover the different ways to save water
Teaching Learning Activities Planned	• Find any five activities that require water. • Student will be shown various water resources in CAL(computer aided learning • Student will ask to draw the container in which water can be store • Students will be shown picture of drought and heavy rainfall area.
Questions on TLOs, HOTS & Correlation with other Subjects	• How do you quench your thirst? • What do you use to wash your clothes • Tell and Write the main sources of water. *Tick the correct option 1.Lake is the (natural/man-made)water body 2.River is the (natural/man-made)water body. In which container you can store less water . Tick the correct option. 1.A glass/ a bucket 2. A jug / a water tank.(coorelate with mathematics).
Life Skills to be developed	• Learner will use water judiciously • Student will identify the water bodies and differentiate man-made and natural sources of water • Students can identify the man made resources and can appreciate the human efforts • Student will get familiar with the places which are affected by water storage and heavy rainfall

Suggested Activities to inculcate Life Skills	• Students will fix the amount of water to be for various activities related to water • Students are suggested to collect the picture of different sources of water. • Students are motivated to make model of man made sources of water.
Strategies to evaluate Life Skills	• Suggestions given by students to save water • Students will develop their critical thinking. • Scientific attitude can be develop • Evaluation can be done through the picture collected by students • Student will show love and care for nature and give their contribution to protect Mother Earth..
