

OUR FIRST SCHOOL

NCERT class 3 EVS Chapter 4

What is School ?

School is a place that is dedicated to teaching and learning . It provides proper learning environment for students. With the help and guidance of teachers students understand the curriculum and enhance learning step by step.

Let's recall our first day in our school and share what all did you learn in the school till now.

We all know that how schools are important for us.

But where from we learned much before coming to school?

From our homes and our
family members

Home is our first school where we
learn the most from our family
members. We spend most of our
time with our family members and grow up seeing them.

Meet Iniya and Sarab. They belong to two different families. Let's know what did they learn from their families ?

I am Iniya. I learnt to speak Tamil from our family. I can sing like my mother. Everybody says that I look like my grandmother. We put bindi called puttu.

I am Sarab. I learnt to speak Punjabi from my family. I have a joint family and I love to listen mythological stories from my grand parents. I want to become a good cricketer like my father.

Family is an intimate domestic group made up of people related to one another by bonds of blood. It can be a nuclear family or an extended family. Family shares many common things like looks, genes, habits, culture ect. Before even knowing about our family teaches us how to speak and communicate. We learn to walk, eat, share emotions through our families. Our family make us feel comfortable and make us ready to go to school and handle things by ourselves.

Now we know that what is family , let's know about who all make a family ?

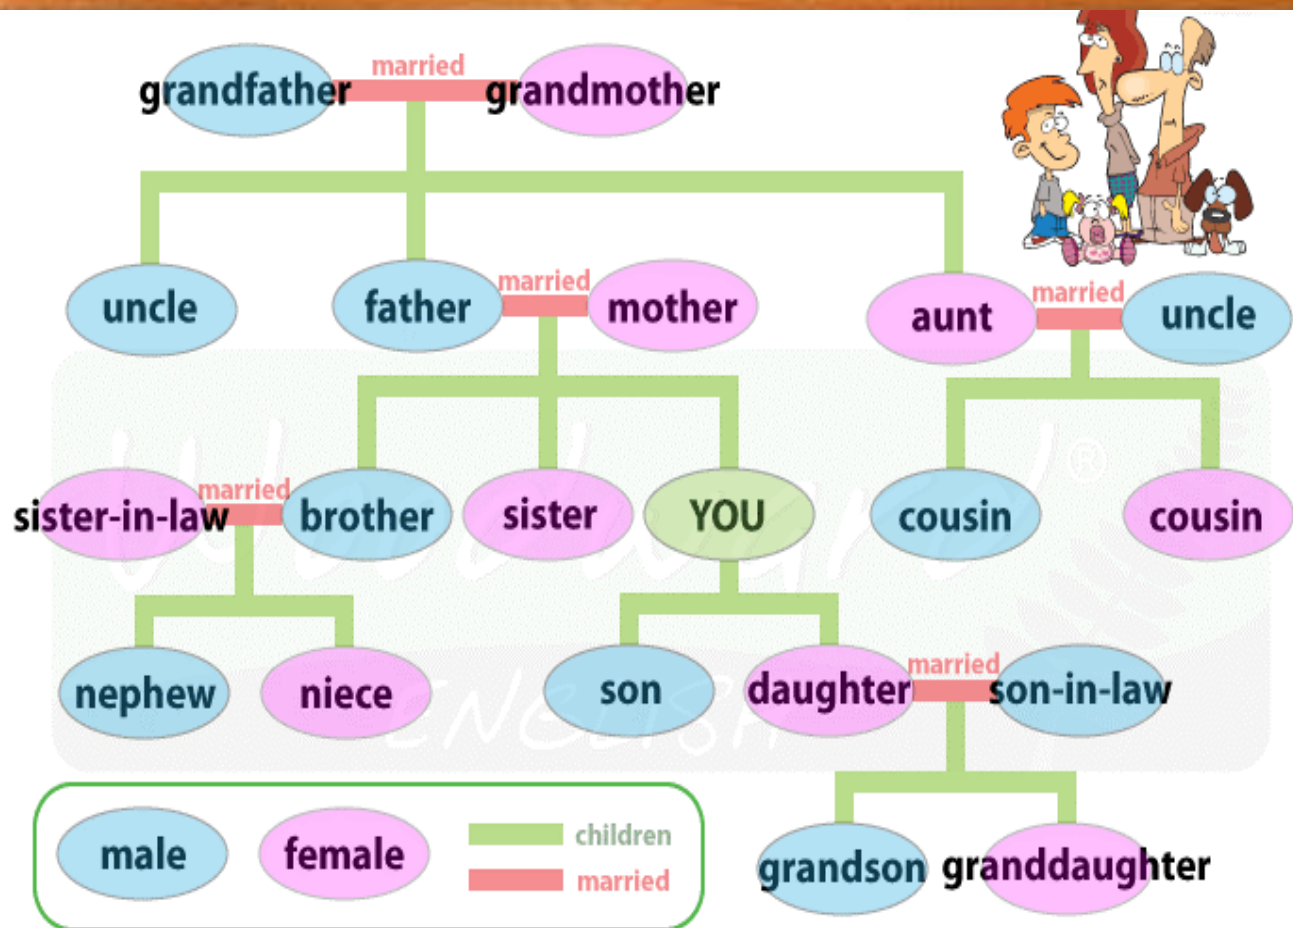

There are two types of families

- *Nuclear – composed of husband , wife and their unmarried children live together.

- *Extended/joint family – Combination of two or more nuclear families live together.

- *We are connected or associated with each other in our family and have different relations with them.

- *People who are part of our family but do not stay with us are our relatives.

Family Chart

My Family

Each family has a different life style, traditions and rules. We observe and follow each other which is essential part of learning. We learn skills , good manners, hobbies from our family members. Sometimes we even follow the same occupation as we keep observing our family members and tend to learn things by watching them.

Now let's discuss what did we learn from our family members ?

ACTIVITY

*Draw a portrait
of your family.
Show the
similarities you
have with your
family
members.*
