

FLOW CHART OF DIGESTIVE SYSTEM

1. Food mixes with saliva, chewed well by teeth, swallowed into throat.

2. Food goes through foodpipe -oesophagus and reaches stomach.

3. **STOMACH** :-In stomach food is churned , made into chyme, mixed with enzymes.

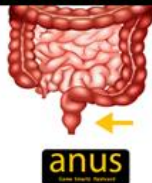

4. **SMALL INTESTINE**:- Food gets mixed with digestive juices ,to break down the food particles.The **NUTRIENTS** necessary for our body is absorbed through blood.

5.**LARGE INTESTINE**:- The food particles that are not absorbed by small intestine reaches large intestine. The large intestine absorbs water and other particles.

the opening at the end of
the digestive tract where
waste leaves the body

6. Waste material is sent out of our body through anus.
