

ACTIVITY

Objective:

Students will be able to make their own model of clock and show the different type.

Material Required:

Cardboard or paper plates, sketch pens, paper pins, scissors, cutter & paper tape.

Activity

Draw a circle on cardboard and cut it along the lines or you can use the paper plate also. Mark 12 equidistant points and write numbers 1 to 12. Now measure a popsicle stick for the hour and minute hands. Cut then and make small hole using a paper pin. Colour the hands and fix it at the centre. Now children can show the different times on their own clocks.

THANK YOU
