

Class activities:

1. **Group activity:** Teacher will ask the students to recite a poem with her based on different views with actions using pom-poms.
2. **Individual activity:** Teacher will show some objects to students from different directions and ask them to tell the view. (students will answer by showing their flash cards)

3. **Individual activity:** Teacher will put a model of a house on the teacher's table in the class. Students will be asked to observe the model of house from different directions and draw the picture of the house in their notebook. Teacher will explain the concept of top, front, side and back view based on this activity to the students.

TOP

4. **Group activity:** Teacher will put some dots on the board and give number to each dot, so that on joining them in sequence a picture will create on the board. Now one by one few students will be called from each row and they will be asked to connect the next number in the sequence. Remaining students will be asked to follow the same in their notebooks.

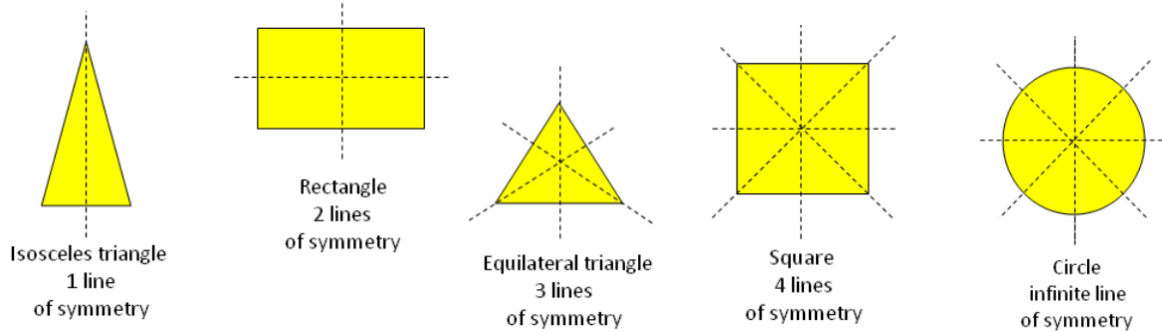

Making rangoli by joining dots activity can also be done.

5. **Individual activity:** Teacher will put the colourful blocks of shapes on the table in front of mirror and students will be asked to come one by one and arrange them in different ways and see how beautiful patterns are creating.

6. **Individual activity:** Teacher will ask the students to take out the cut-outs they brought from home. Now step by step by folding the cut-outs teacher will explain about symmetry and line of symmetry. Students will follow the teacher step by step in this activity.

Home activities-

- a) Students will be asked to make a mask using symmetry.
