

Learning Activity

TOPIC- Multiplication

MATERIAL REQUIRED:

- Two sets of cards(one set should have 2-digit numbers and other set should have 3-digit numbers, kept randomly)
- Paper
- Pencils

Details of the activity and detailed instructions to carry it out:

- 1) The class is divided into two teams – A and B.
- 2) The two sets of cards are kept on the teacher's table, in the center.
- 3) A coin is tossed in order to find out which team asks the question first and start the game.
- 4) The teacher calls out the name of any one student from the toss winning team. The student from that team is required to pick up one card from each set and ask the product of those two numbers and the other team is required to answer. The teacher asks the answer from anyone student from the other team.

Example: - 153×37

- 5) Now, it's the other team's turn to pick up the cards and ask questions. The teacher also maintains the score of both the teams.
- 6) The game continues until all the students of both the teams have participated.
- 7) The team having more score wins.

Tip for the teacher: The teacher should make sure that there is enough number of cards in each set such that every student in the class is able to participate.

Objective of the activity: To boost student's engagement and accelerating learning.
