

CHAPTER-7
DIRECTING
EXPERIENTIAL LEARNING
CLASSROOM ACTIVITY
TOPIC- COMMUNICATION BARRIERS

The class will be divided in groups. Each group will consists of six students. The students will be asked to stand in a circle where barriers or obstacles will be created by putting some objects like duster, book etc. One student will be selected who will close his eyes with a cloth band and stand in a circle.

There will be a point in the circle where the selected student has to reach within the minimum possible time limit. Another member of the group will give him instructions like left, right, jump etc. so that he crosses all the barriers and reach his target point. He should neither touch any object nor the boundaries of the circle. Same procedure will be followed by all the groups. By this activity the students will come to know how the receiver will interpret the message given by the sender.

Learning outcomes of the activity-

Perception, Communication, Leadership, Motivation, Attitude, Psychology and Personality.
