

**Lesson Plan- Ch-8(FLYING HIGH)**

Learning Goals	• Names of different birds. • Habitat. • Food they eat.
Learning Outcomes (LO)	• Students will be able to list the name of different birds. • They will immitate the sounds of the birds they have heard. • Able to observe that every bird is unique in its colour and size.
Teaching Learning Activities Planned	• Explain the birds around us like sparrow, crow, pigeon , woodpecker , mynah, cuckoo ,eagle ,vulture etc. • Sounds of birds will be made available to the students by going outdoor and also with the help of internet resources.
Questions on TLOs, HOTS & Correlation with other Subjects	Slow Learner – Name the birds you have seen nearby your home and school. High Achiever – How the beaks are helpful for the birds? How the feeding habits of birds are different from us?
Life Skills to be developed	Love and affection towards the birds. Like every bird every individual is unique in its own way .
Suggested Activities to inculcate Life Skills	Students should be motivated to keep the water and grains on the roof of their houses or in the school's grounds for the birds. Students will be asked to tell the quality of his/her classmate .
Strategies to evaluate Life Skills	Individual Task Team Work
