

SHARING OUR FEELING

We all want to share our feelings.

- Problem faced by people in old age
- Problem faced by people who can not see

Old and disabled people need our love and care

In old age people face many problems. Some can not see properly, some can not hear properly, some can not walk properly. Some face health issues like back pain, joint pain etc.

Problems faced by people who can not see

- People who can not see face problems in reading, writing, walking, recognizing things etc.
- Blind people recognize the people around them from the sound they make as they move. They can even tell whether they are happy or sad by hearing them.

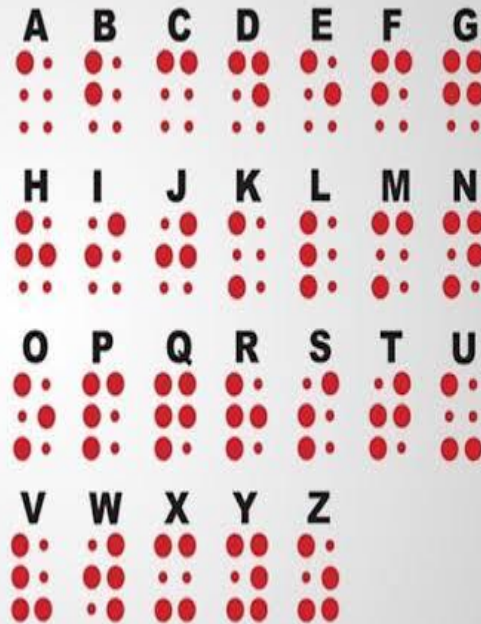

Blind people use Braille script to read and write.

- Braille is the special way of reading and writing for blind people. It is written on a thick paper by making a row of raised points with a pointed tool. Braille is read by running the fingers on the raised dots.

Louis Braille

- Louis Braille belonged to France. He lost his eyesight at the age of three. As he had keen interest in studies he found a way to read by touching and feeling. This way of reading is known as Braille Script.

Pavements and roads for blind

Traffic signal for blind.

Disability is not a curse. Let's help
them to help themselves.
